THE TRIMMING YOU REQUESTED turned out well considering I'm new to such things. For instance, why do any of this by hand? If I used the lawn mower on the hedges then they would be lower in the first place. Ok sure, they would be *really* low, but think how much fuel we'll save over the long run. *Right I know, by hand and it wouldn't use fuel, but you need to think more openly, even radically.* Again, the entire grounds will have a much lower appearance, almost *like a flat-top haircut*. You know, like barbers used to give but instead of centimeters, think acres, basically like the entire grounds, but in a mannered flat shape. The watering instructions all made perfect sense considering the roses have been moved to a new area. Keep in mind, as groundskeeper, my laziness is of proportion that can modestly be described as *epic*. For instance, do you really expect me to water in such warm weather? Seems only logical that roses could lift a finger and turn on the water. Or how about this, *the watering system could be activated by cell phone!* You know, make a call and the system turns on. Of course I couldn't do that though. Aside from being a lot to ask, you don't pay me enough to afford a cell phone so naturally I couldn't activate the system. I see, if you added me to the group plan, the phone for the roses would be cheaper.
