Light 11 pt.

Similar in concept to stencils, the Wrico Lettering System came equipped with a specially fitted felt pen, a set of plastic letter guides and a platter that served as the baseline. To begin, the user simply set a baseline with the platter and traced the letters through the template to construct the desired words. However, like many stencils, the Wrico letters were at once charming and useful but rife with

Light 9 pt.

Similar in concept to stencils, the Wrico Lettering System came equipped with a specially fitted felt pen, a set of plastic letter guides and a platter that served as the baseline. To begin, the user simply set a baseline with the platter and traced the letters through the template to construct the desired words. However, like many stencils, the Wrico letters were at once charming and useful but rife with technical mishaps. For instance, the letters have no overshoot, horizontal stroke thinning or any optical compensation between characters. Charming as primitive shop lettering, these inconstancies are too specific to pens and templates to translate well into typefaces for daily use so they were put aside in favor of something more consistent. Round tips, nearly geometric curves, what appear to be circles (though they certainly aren't) and alternate letters all make appearances in the Bryant family of fonts today.
